Topfix[®]

The first sunprotection-screen applicable
to withstand extreme wind loads

Description

RENSON® Sunprotection-Screens introduces the Topfix®: zenithal sunprotection using a revolutionary new tension technology: a combination of our well-known Fixscreen® technology and a specific tension system. The result is exceptional fabric tension, even in cases of extreme wind loads up to 120 kph*. Flapping and ruptured fabrics are a thing of the past. The compact box fits perfectly within every design.

The zenithal sunprotection prevents overheating in light panels, skylights and small conservatories. Complete blackout is possible by means of blackout fabrics whether used inside or outside and this until 15 m² (double).

Product

- Sunprotection with excellent fabric tension
- Intelligent wind-resistant guide system using Fixscreen® technology
- Extremely wind tight: warranty up to 120 kph in closed position*
- Motor control
- Compact design
- Frames available anodised or powdercoated in any RAL colour
- Soltis® polyester fabric in a wide range of colours or Soltis® blackout polyester fabric.

Applications

- For all kinds of vertical, horizontal or inclined glazing: such as light panels, sloping or pitched roofs, skylights, conservatories, etc.
- For all window types: aluminium, wood, PVC
